

# November Long-Range Planning Survey Results

The following report contains the tabulation of the long-range planning survey conducted at St. Francis and St. John the weekend of November 19-20, including absentee surveys submitted to the parish offices. There is significant majority support for the vision of a new parish church and facilities. St. John would have its sole mission as campus ministry, and the church building of St. Francis would be retained. Major concerns expressed in the comment sections of the surveys included financial aspects of the vision, location of a new parish facility, and the pastoral impact upon campus ministry.

While the results of the survey provide a basis on which the long-range planning committee can chart the next steps in the process, it is important for all the voices of the parish to be heard. Many people expressed a desire to know more concrete details of what the vision entails. The long-range planning committee can begin working on such details now that parishioners have expressed general support for the broad outlines of the vision. A venue and date for a town hall meeting of the whole Stillwater Catholic Community is being determined, hopefully in mid- to late January. This will allow for greater discussion and clarification of where the planning process will go.

Thank you to everyone who participated in our parish-wide survey in November, and thank you to everyone who continue to keep the important work of our Stillwater Catholic community in your prayers!
